COMPLIANCE: Critical Info for SCOs & Alberta Municipalities Permitting Design Projects

- ▶ When does an architect or licensed interior designer need to be involved in a building project?
- ▶ How are architectural drawings legally authenticated and sealed?
- ▶ How can permitting officials protect their community from liability?

March 11 2020 NOON

This unique one-hour course – hosted by registered architects and municipal permitting experts – has been expressly designed for **Alberta's safety code officers** and frontline **municipal permitting officers**.

The content of this course will also be of practical interest to any **architect** or **licensed interior designer** involved with municipal permitting.
